SUMMARY

Third-year CS undergraduate with strong OOP fundamentals across Java, C++, and JavaScript, and a track record of building complex software systems from scratch. Demonstrates a growth mindset through 700+ competitive programming problems solved and continuous adoption of new technologies and engineering methods. Passionate about writing reliable, performant software and collaborating with teams to solve meaningful problems at scale.

EDUCATION

Vellore Institute of Technology

B.Tech in Computer Science and Engineering (Internet of Things) – CGPA: 9.12/10

Vellore, Tamil Nadu

2024 – 2028 (Expected)

Pragjyotish Senior Secondary School

Senior Secondary (Class XII) – Percentage: 91.8%

Guwahati, Assam

2024

Pragjyotish Senior Secondary School

Secondary (Class X) – Percentage: 89.8%

Guwahati, Assam

2022

TECHNICAL SKILLS

Languages

C++ Java C JavaScript Python Bash

Backend

Node.js Express.js REST APIs JWT Auth

Frontend

React HTML CSS

Databases

MongoDB MySQL

Tools

Git GitHub Postman VS Code Linux/Bash

Core Concepts

Data Structures & Algorithms DBMS Concurrency & Multithreading Synchronization OOP Computer Networks
Operating Systems

PROJECTS

Lamb | Interpreted Programming Language

[GitHub](#)

- Applied sound **software engineering principles** to design and build a **dynamically typed, tree-walk interpreted language** in Java from scratch, without external dependencies, demonstrating **end-to-end ownership** of a complex system.
- Implemented a complete **multi-stage compiler pipeline** – lexical analysis, recursive descent parsing, **AST generation**, and scope-based name resolution – incorporating best practices from language design literature throughout.
- Developed full runtime support for **closures, first-class functions, user-defined classes**, and classical inheritance; proactively studied interpreter patterns to improve **language reliability and correctness**.

Java Interpreter Design Recursive Descent Parsing AST Object-Oriented Programming

ChatterNet | Multi-Client TCP Chat Server

[GitHub](#)

- Architected a **concurrent TCP chat server** in C++ handling **50+ simultaneous client connections**, applying engineering principles to ensure **high availability, low-latency** message delivery, and stability under load.
- Designed **message routing** across isolated persistent chat rooms, username-based **direct messaging**, and broadcast messaging with graceful disconnect handling – driven by user requirements for reliability and seamless experience.
- Engineered **thread-safe client management** with **mutex synchronization and multi-threading**, eliminating race conditions; adopted **observability practices** by logging connection events and error states to aid debugging at scale.

C++ TCP/IP Networking Socket Programming Multithreading Winsock

Project Camp | Full-Stack Project Management Platform

[GitHub](#)

- Collaborated with stakeholders to build a **full-stack collaborative workspace** supporting **hierarchical task distribution**, nested subtasks, and **role-based membership** using Node.js, Express.js, and MongoDB.
- Designed and implemented **secure REST APIs** with **JWT authentication**, input validation middleware, and structured endpoint routing, applying industry best practices to maximize **API reliability, security**, and developer experience.
- Achieved **clean separation of concerns** through dedicated controller layers and **modular, decoupled architecture** – improving scalability, consistency in data management, and long-term maintainability for team productivity workflows.

Node.js Express.js MongoDB React REST API Design JWT

ACHIEVEMENTS & CERTIFICATIONS

- Problem Solving:** Solved **700+ DSA problems** across LeetCode, CodeChef, GeeksforGeeks, and HackerRank – arrays, graphs, trees, dynamic programming, and system design patterns – demonstrating strong CS fundamentals applied to complex engineering problems.
- LeetCode:** Top **25% globally** with a top **150,000 worldwide** ranking; consistently reviews optimal solutions and applies new algorithmic knowledge to future problems.
- Platform Ratings:** Rated **2-Star Coder** on CodeChef and earned **6+ badges** across skill verification platforms – reflecting continuous effort to seek feedback and improve technical solutions.
- Certifications:** **HackerRank Certified** in Data Structures and Python; demonstrates proficiency in industry-relevant algorithmic problem solving and software engineering fundamentals.
- Continuous Learning:** Proactively studies new engineering methods including compiler theory, systems programming, and distributed architecture to stay current with industry best practices.
- Technical Profiles:** [LeetCode](#) | [GeeksforGeeks](#) | [CodeChef](#) | [HackerRank](#) | [Codolio](#)
